Contents

Table of Contents

Your smart report includes the following section

Sr. No.	Section	Page No
01	Lifestyle Diseases Covered	04
02	Tests Covered	05 - 06
03	Risk Assessment Overview	07
04	Your Health Summary	08
05	At A Glance	09
06	Risk Summary & Actionable Insights	10
07	Lifestyle Diseases Risk Analysis	12-19

Poweredby3 of 20
Overview

Lifestyle Diseases Covered

- 1
NAFLD (Non-Alcoholic Fatty Liver Disease)
- 2
Cardiac Health
- 3
Obesity
- 4
Oxidative Stress
- 5
Thyroid Health

Tests Covered

Complete Haemogram

- Absolute Basophils Count
- Absolute Eosinophils Count
- Absolute Lymphocyte Count
- Absolute Monocyte Count
- Absolute Neutrophil Count
- ESR Automated
- Hemoglobin Hb
- MCH
- MCHC
- MCV
- MPV Mean Platelet Count
- PCV Hematocrit
- Platelet Count
- WBC
- RDW
- Neutrophils
- Eosinophils
- Lymphocytes
- Monocytes
- Basophils
- RDW-CV
- MENTZER INDEX
- Red blood cells
- GK Index
- RDWI

Kidney Function

- Urea
- Creatinine
- Uric Acid
- Creatinine eGFR
- BUN Urea Nitrogen
- Calcium Total
- BUN/Creatinine Ratio
- Urea/Creatinine Ratio

Hormonal Tests

- Total Testosterone level

Lipid Profile

- Total Cholesterol
- HDL Cholesterol Direct
- LDL Cholesterol Calculated

- Triglycerides
- Non HDL Cholesterol
- CHOL/HDL Ratio
- VLDL Cholesterol
- LDL/HDL Cholesterol
- HDL/LDL Cholesterol Ratio

Liver Function Tests

- Albumin
- Alkaline Phosphatase
- Total Bilirubin
- Direct Bilirubin
- Indirect Bilirubin
- GGTP
- Proteins Serum
- SGOT (AST)
- SGPT (ALT)
- A/G Ratio
- Globulin
- SGOT/SGPT Ratio

Vitamins

- Vitamin D Total-25 Hydroxy
- Vitamin B12

Iron Profile

- Iron
- TIBC (Total Iron Binding Capacity)
- Transferrin saturation
- UBIC

Poweredby5 of 20
Labs

Tests Covered

Inflammatory Markers

- Homocysteine
- ESR - Erythrocyte Sedimentation Rate
- HS - CRP

Diabetes Profile

- HbA1C
- Fasting sugar

Urine Routine & Microscopy

- Ph Urine
- Urobilinogen
- Colour
- Transparency
- Sugar
- Blood(Urine)
- RBC

- Pus Cells
- Epithelial Cells
- Crystals
- Cast
- Bacteria
- Yeast Cells
- Nitrate
- Urine Ketone
- Urine Protein
- Bile Pigments

Thyroid Profile

- Tri-iodothyronine (T3)
- Thyroxine (T4)
- TSH-Ultrasensitive

Lifestyle Diseases Risk Analysis

Dyslipidemia

What is Dyslipidemia?

Dyslipidemia is a condition in which the levels of cholesterol or triglycerides in the blood become unhealthy. If left unmanaged, it can gradually increase the risk of heart attack, stroke, and other cardiovascular diseases.

Current Risk Score

Your score is **1** out of 100 **Healthy**

Score is calculated based on: Lifestyle choices · Blood markers · Genetic factors · Questionnaire responses

What could be affecting your results?

No contributing factors provided for this assessment.

Lifestyle Contribution

Cardiac Health

What is Cardiac Health?

Cardiac health reflects how well your heart and blood vessels support healthy blood circulation. This score estimates your cardiovascular risk based on factors like blood pressure, cholesterol, blood sugar, weight, and lifestyle.

Current Risk Score

Your score is **9** out of 100 **Healthy**

Score is calculated based on: Lifestyle choices · Blood markers · Genetic factors · Questionnaire responses

What could be affecting your results?

No contributing factors provided for this assessment.

Disease Risk Analysis

Oxidative Stress

What is Oxidative Stress?

Oxidative stress occurs when harmful free radicals outweigh the body's antioxidant defenses, leading to gradual damage of cells and tissues. Over time, this imbalance may contribute to aging and increase the risk of several chronic diseases.

Current Risk Score

Your score is **20** out of 100 **Healthy**

Score is calculated based on: Lifestyle choices · Blood markers · Genetic factors · Questionnaire responses

What could be affecting your results?

No contributing factors provided for this assessment.

Disease Risk Analysis

NAFLD

What is NAFLD?

Non-Alcoholic Fatty Liver Disease (NAFLD) is a condition where excess fat builds up in the liver in people who drink little or no alcohol, commonly linked to obesity, diabetes, and metabolic syndrome. If left untreated, it can progress from simple fatty liver to inflammation, fibrosis, cirrhosis, and even liver failure.

Current Risk Score

Your score is **9** out of 100 **Healthy**

Score is calculated based on: Lifestyle choices · Blood markers · Genetic factors · Questionnaire responses

Disease Risk Analysis

Thyroid Health

What is Thyroid Health?

The thyroid gland produces hormones that regulate metabolism, energy production, body temperature, and many essential body functions. Changes in thyroid function can affect multiple organs and influence weight, heart rate, mood, and overall metabolic health.

Current Risk Score

Your score is **3** out of 100 **Healthy**

Score is calculated based on: Lifestyle choices · Blood markers · Genetic factors · Questionnaire responses

Disease Risk Analysis

Type 2 diabetes

What is Type 2 diabetes?

Type 2 diabetes is a metabolic disorder in which the body becomes resistant to insulin or does not produce enough insulin to maintain healthy blood sugar levels. Persistently elevated blood glucose can damage the eyes, kidneys, nerves, heart, and blood vessels over time.

Current Risk Score

Your score is **13** out of 100 **Healthy**

Score is calculated based on: Lifestyle choices · Blood markers · Genetic factors · Questionnaire responses
